

# Remittance platform technology

## Decentralized Platform w/ enhanced risk management

- WireBarley interconnects WireBarley's independently distributed platforms across regions.
- WireBarley utilizes Distributed Ledger Technology to record and verify cross-regional transfer data transmitted using WireBarley's proprietary algorithmic technologies
- Integrated global risk management service provider into platform for enhanced AML/CTF measures (machine learning, FDS)

## Remittance PaaS (Platform as a Service)
